

Election for School Trustees on Monday Next, February 9th

School Meeting Brings Forth Very Spirited Discussion

Members Object to Chairman Soliciting Insurance and Free Discussion Results

At the opening of the annual ratepayers meeting to take up the reports of the trustees for the year, Chairman Snowdon stated it had been a satisfactory year, and the reports were very gratifying, indicating that an efficient staff was in charge.

Preference had been given to local teachers for the public schools, provided they had the required qualifications. Taxes and arrears had come in better than in the previous year, despite the depression.

Lack of technical education was commented on, and the efforts made some time ago by trying to arrange for a consolidated high school.

Lewis Jones asked how the high school results compared with other schools of similar standing, to which Principal Hoyle stated that they compared very favorably with the city schools. Last year Coleman was only one per cent below Calgary in the units passed. 99 students were enrolled in the high school.

Trustees Glendenning and Sam Moores reported on various improvements, including a new fire escape.

Alex. Cameron, a past chairman of trustees, gave a very interesting address and some advice to the board to carefully watch expenditures. He had been a chairman for 22 years, and had seen difficult times, which were successfully met and overcome by individual loyalty of prominent citizens. He was pleased to note the schools were in good shape, and felt that good value had been received for money expended.

The school board had an even greater responsibility than the town, and he still took as much interest in Coleman schools as when he was an active member of the board.

Chairman Snowdon referred to criticism which had been levelled against himself because he had so

lited life insurance from some members of the staff. He stated that he considered he was pursuing his legitimate business, and had done nothing that he was not prepared to discuss in the open.

He canvassed them in the same manner as he would any person whom he considered a prospect for life insurance, and he had nothing to take back in this respect.

Trustees Moores and Hope told of a mother of one of the teachers complaining to him because she did not want to take insurance, and also that the division of the fire insurance of the school board had caused some dissatisfaction.

A motion was read from a school board meeting, showing that it had been passed that if satisfactory arrangements could be made, the insurance was to be divided among the three licensed agents in town, and the one through whom the business was placed was to receive ten per cent of the business for handling it.

From the discussion, the trustees with the exception of the chairman evidently were later dissatisfied, and considerable discussion as to conversations between various individuals, insurance agents and the trustees was reported to have taken place. Cr. Pattinson proposed that they should all get together and settle the matter in a mutually satisfactory manner, as it was impossible for the ratepayers at this meeting to decide. If a satisfactory solution could not be arrived at, then would be the time to call a ratepayers meeting. Chairman Snowdon said he would take steps to stop the talk that had been going on, and he would fight it out on the board.

He believed it was a personal matter to oust him from the school board, but he intended to see the matter through, and would certainly not resign, as had been suggested.

After this item had been set in type The Journal was given to understand that at the regular meeting of the School Board held on Tuesday evening, this matter had been settled satisfactory to all concerned.

The Coleman Taxis held a party in the club rooms on Tuesday evening, about forty girls and boys being present. Many games were played and a good time was had by all.

A Governor General Departs

Full military honors were accorded Viscount Willingdon, on the occasion of his sailing from Saint John, N.B. in the Canadian Pacific liner "Montclare", on relinquishing his post as Governor General of Canada to assume that of Viceroy of India. The pictures show: the vice-regal party on board ship, including Their Excellencies Viscount and Lady Willingdon; Captain G. Fitzgibbon McCombie, of the "Montclare"; Colonel Humphrey Snow, Comptroller of the Household; and Lieutenant D. H. Fuller, A.D.C.; the inspection of the guard of honor, with Captain Streetfield, A.D.C., in the foreground; he had a special berth on the ship; taking the salute in front of the Admiral Beatty Hotel, and one of the gun-crews of the saluting battery on Partridge Island, which fired 19 guns as the liner passed, bearing Their Excellencies to England.

Local Elections on Monday

The following nominations were received by Jas. Ford, returning officer, on Monday.

Town Council		
Candidate	Mover	Seconders
John Jackson	George Paterson	A. M. Morrison and Jno. Houghton
Wm. L. Borrow	James Moores	John M. Rushton
J. M. Rushton	Mrs. Lawlett	Steve Leoski

(These are elected by acclamation.)

School Board		
Candidate	Mover	Seconders
William Antrobus	W. H. Haysom	A. Cameron and Sam Moores
Frank Barringham	H. C. McBurney	Thomas Blower
George Hope	George Pattinson	F. Fairhurst
James Allan	Alex. Cameron	J. H. Graham
James Glendenning	Jno. Houghton	Nell MacKinnon and Lewis Jones

Big Turnout at Smoking Concert to Honor J.C. Cox

Handsome Inscribed Watch and Address Presented Retiring Pit Boss at Big Gathering

After 21 years service at the International Mine first as miner and later as pit boss, J. C. Cox resigned on Jan. 31, and will spend some time in travelling before he settles down again.

A striking tribute to the esteem of all classes was shown in the big turnout last Friday evening in the K. of P. hall, when Harry W. Clark most capably filled the office of chairman.

The address read by Supt. J. A. McLeod, was as follows:

To Mr. J. C. Cox:

We, your Coleman fellow employees and friends, take this opportunity to express our regrets on your departure from our midst after 21 years among us. You indeed have won many lifelong friends by your genial manners and sterling qualities, and we feel that your departure will be a long felt loss to our social and business life, but that which is our loss, we hope and trust will be your gain in furthering your prosperity and happiness.

We, one and all, have always admired your bright, pleasing

ways, and it will be a long time before your position will be so capably filled.

In your new sphere of life may you be successful and gather about you a group of new friends as loyal as the old.

Trusting you will accept this small gift as a token of our esteem and hoping that the sight of this will recall your former friends and the men you worked with so long, and the good times spent amongst them.

We again unite in wishing you all the health, wealth, luck and prosperity.

Signed on behalf of your friends and fellow employees, per J. A. McLeod.

In his opening address, the chairman, Harry W. Clark, expressed Mr. Whiteside's regret at being unable to be present owing to absence from town. He dealt upon the long service of Mr. Cox and pointed out that every branch of the mine was represented, also officials from Mine Inspector's Dept., Mine Rescue Car and that townspeople were there.

Those who spoke were Moses Johnson, Inspector Healy, Ed. Royle, of the Mine Rescue Car, C. J. Devine, for the outside workers; Wm. Lees for the below ground men, and Major Barnes for the citizens.

Programme

- Chairman's Remarks.
1. Orchestra, Polish.
2. Comic song, E. Hill.

Coleman and Blairmore Again Tied in Crows Nest Pass League Play-Off

The first game of the first section of the C. N. P. League play-off was won by Blairmore 2-1, and the second game was won by Coleman 2-0, putting Coleman at the head of the first section.

The first game of the second section was a 1-1 draw between Coleman and Blairmore and the second game was won by Blairmore 3-0. Goals scored by Vejprave 2, and McKay 1.

This ties both teams up again, and home and home games will be played on Saturday, Feb. 7th at Coleman and Monday, Feb. 9th at Blairmore, to decide the winners of the league.

President Appointed

At a recent meeting of the directors of the International Coal & Coke Co. in Calgary, H. Davidson, of Vancouver, formerly vice president, was elected to the office of president, succeeding the late A. C. Flumerfelt. H. J. Davis of Victoria was elected to the executive committee of the board. The annual meeting will be held in Vancouver on March 26.

The ladies prize at the miniature golf course was won by Mae Bell with a score of 43.

3. Song, A. J. Phillips
4. Cornet solo, J. Lowe
5. Quartette, J. Cox, A. Reynolds, A. Phillips, H. Chamberly
6. Orchestra, Polish.
7. Presentation and address.
8. Song, W. Lewis.
9. Zolophone solo, H. Parkinson.
10. Song, W. Smith.
11. Quartette, W. Badziach, K. Bator, J. Kryzka, F. Chuchla.
12. Accordion solo, Nick Milo and Co.

13. Song, Steve Panek.
"Auld Lang Syne"
"God Save The King."
A hearty vote of thanks and the singing "For He is a Jolly Good Fellow" was accorded the chairman at the conclusion of the evening.

Ratepayers Hear Annual Reports of Committee Chairmen

About 30 Present to Review Town and Schools Administration During 1931

At the opening of the meeting on Friday last in the council chamber, Mayor Moores gave an address on the activities of the council during the year, especially in regard to efforts made to enlarge the town's boundaries to take in additional property. In view of the difficulty of collecting tax arrears, the council had practised strict economy.

Since 1928 arrears had increased from \$7438.49 to \$10,038.80, an increase of nearly \$2600.00. This was commented on by some present, and the town secretary said persistent efforts were being made to collect the arrears.

Cr. Pattinson gave the financial report as chairman of the finance committee, also the report for relief, which showed increased expenditures owing to various causes.

Work and Property report was given by Cr. Nelson, Light and Water by Cr. Snowdon. Attention was called to the amount expended for light and water by the town amounting to over \$3,000, and Mayor Moores stated that a reduction had been made over last year's expenditure, when it was considered that additional street lights were included. In any event the ratepayers present thought it a heavy item in the town's expenditures.

M. Stegler asked why the petition for a light had not been granted at the east end of Main street. Lack of funds was the answer given by the mayor.

At the close of the town meeting, a vote of thanks was accorded the mayor and councillors. It was the best attended meeting in the past three years.

The financial statement, which appeared in last week's issue of The Journal, gave all particulars of the finances of the town in regard to receipts and expenditures. Copies may be obtained.

Announcement

Mr. Frank Barringham wishes to announce that he does not work for the Coleman School Board or receive wages from them in anyway.

Masonic Presentation

J. C. Cox was the recipient of a presentation by Summit Lodge A. F. & A. M. last Thursday, A. E. Graham, W. M., making it on behalf of the members. The meeting was followed by a social hour and refreshments.

ST. ALBAN'S CHURCH

The services next Sunday will be as follows:

- 11 a. m. Holy Communion and Sermon.
- 2 p. m. Sunday School.
- 3 p. m. Bible Class

Last Thursday evening a most enjoyable party was held in honor of Mrs. Hope and Mrs. Bowen at the home of Mrs. Hope. Cards were played and the prize winners were Mrs. White and Mrs. Hoggan. Refreshments were then served followed by games and the party broke up about 12 o'clock.

Coleman Service Garage

Announcement

I hereby announce that I have taken over the shop business of the Coleman Garage, Limited, which will in future be known under the name of Coleman Service Garage. Car owners are assured of prompt and complete service in all repair work and servicing of cars of all makes.

Good Grades of Motor Oils Greases and Supplies

Andy Bordula - Proprietor

102 million more cups of Salada tea were consumed in 1930 than in 1929 by the people of Canada.

Taking the Census

One of the important pieces of work to be undertaken by the Federal Government this year is the census enumeration of the people of Canada, and the compiling of a vast amount of other information dealing with the status of our citizenship, and indicating the development of the Dominion within the past ten years.

The taking of the census is a big job, and an exceedingly important one. It requires elaborate and complete organization, careful publicity to acquaint people with what is expected of them when the enumerators call, and a small army of men to gather the information required, and another large group of experts to assemble and classify the information when it is received by the Department at Ottawa.

It is quite possible that some people look upon the taking of the census as a matter of comparatively small importance, and that, at this time especially, the large expenditure of money involved could be put to much better use. Such a view, however, is not only very superficial but quite erroneous. Taking the census is important in any country, but in no other country does it have quite so pronounced an effect as in Canada, and more especially in Western Canada.

In the first place, the representative of each Province of the Dominion in the House of Commons at Ottawa is based upon the census figures. The constitution of Canada stipulates that the basis of representation in the House of Commons shall be one member for each one-sixty-fifth of the population of Quebec. That is, Quebec shall be represented by sixty-five members regardless of its population. Dividing the total population of Quebec by sixty-five gives the number of people represented by each member, and that same number of people in each of the other Provinces become entitled to a member. In other words, an absolutely fair basis of representation is thus arrived at.

Money grants to the Provinces from the Dominion treasury are also based upon population, but in the case of the Western Provinces a larger number of grants rest on this basis than is true of other Provinces. For example, grants to these Provinces in lieu of lands increase as population increases until the maximum is reached. Consequently it is important that an absolutely accurate census of our people be recorded, and especially so in the case of the West which is the most rapidly growing section of the Dominion. Increased western representation at Ottawa will likely have a profound effect upon national policies, while larger money grants will enable our provincial governments to meet the growing needs of these western communities.

The census is likewise a national stock-taking. It will reveal the extent of our growth and development as Provinces and as a Dominion within the past ten years. It will reveal to us evidences of national strength and disclose where weaknesses exist. For all these reasons it is important that every citizen fully co-operate with the enumerators and officials in making the census this year complete and accurate in every respect.

The census of 1931 will be the seventh decennial census of Canada since Confederation. It will be of interest to recall what the previous six "counting of noses" disclosed in the matter of Canada's population. Following Confederation in 1867, the first census was taken in 1871 and revealed a population of 3,485,761. By 1881 the population had grown to 4,342,810; in 1891 to 4,833,239; in 1901 to 5,371,315; in 1911 to 7,206,643, and in 1921 to 8,788,483.

It will be noted that whereas between 1881 and 1891, and between 1891 and 1901, the population increased by only half a million in each ten year period, the increase between 1901 and 1911 was nearly two million, and between 1911 and 1921 a million and a half. That is, whereas Canada's population only increased by one million in the last 20 years of the nineteenth century, it increased by three and one-half million in the first 20 years of the twentieth century.

The settlement of these Western Provinces accounted for much of this larger increase. In later years, however, there has not been the same phenomenal flow of immigration into the West, while on the other hand, the great productive and purchasing power of the West has contributed enormously to the industrial growth and prosperity of Eastern Canada. As a result, this year's census may not disclose the same ratio of increase in the West as compared with the East.

In view, however, of the important bearing which the census has upon both the economic life and the public administration of affairs of Canada it is, let it be repeated, of the utmost importance that all citizens co-operate thoroughly with the army of officials entrusted with taking this year's census in order that it may be a most efficient and reliable statistical record of the Dominion.

Propose Canadian Air Tour

Plan Suggested At Convention Of Clubs In Montreal

A national air tour that would extend from the Atlantic to the Pacific, and in which every aeroplane club would participate, was proposed at the convention of the Canadian Aeroplane Clubs' Association held in Montreal. The tour as outlined by its proponents would be as much as possible representative of the advancement made by Canada recently in the field of aviation. An armada of planes going from airport to airport would, it is thought, yield very beneficial results from the point of view of the public.

Germs Revived After Centuries In Rock

Adapt Themselves To Airless Condition and Learned To Live Without Breathing

Suspended animation in case of germs for as much as 1,000,000,000 years was demonstrated by Prof. Charles B. Lipman, of California University, before the American Association for the Advancement of Science.

Dr. Lipman said that proof of bacteria surviving for hundreds and even thousands of million years was found by him in pre-Cambrian rocks and in coal deposits.

These life germs, which normally require oxygen, adapted themselves to an airless condition and learned to live without breathing.

When rock and coal were crushed in sterilized mortars the powder was nourished in nutritive medium of coal extract with one per cent. peptone, the spores begin to live again after millions of years of inhibited life.

MIDDLE AGE

A Critical Time For All Women

"I am beginning to feel my age" is the confession many a woman has to make when she reaches the critical time of middle life. There is no need, however, to think you are too old to be well and happy.

Perhaps you have lost your grip on things; perhaps the old vigor and energy is lacking; you get tired easily, and your limbs ache terribly. Often your back seems ready to break and the pain is unbearable. Your blood is at fault—it has become thin and impure and does not give the health-giving nourishment to the body. What you need is a treatment of Dr. Williams' Pink Pills. They will give you the blood actually make rich, red, health-giving blood and this good blood will drive out all your aches and pains.

Dr. Williams' Pink Pills will banish headaches, backaches, nervousness and lack of appetite, and in their place will come new energy and happiness. You can get these Pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Evolution Of The Windmill

New Use For Windmill Is In Connection With Airplanes

Windmills, like many other things and people, have moved with the times. In their new guise, they may possibly not be so picturesque as their forefathers, but they are playing an important part in the industrial life.

Modern windmills pump water, also supply electric light for light-houses.

The most up-to-date use for the windmill is in connection with airplanes. The auto-giro, or windmill plane, is now so far advanced that Thomas Edison, the world-famous inventor, has expressed his firm belief that this invention will revolutionize world flying.

Miller's Worm Powders will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon. They destroy the worm channels thoroughly of these destructive parasites and restore the inflamed and pained surfaces to healthfulness. They are an excellent remedy for these evils.

Vast Sums In Life Insurance

One Hundred and Eleven Billion Dollars Of Life Insurance In Force

Since the close of the Great War, life underwriters have brought into being a far larger estate than the combined national debts of the belligerent nations, Frank M. See of St. Louis, Mo., told the educational congress of the Life Underwriters Association of Canada, held at Ottawa.

He said there was one hundred and eleven billion dollars of life insurance in force, guaranteed by eighteen billion dollars as a reserve fund. This staggering total of assurance was held by seventy million people, one-fifth of whom were on the American continent.

Firewood for cooking is still used in more than half the farm homes of New Hampshire, judging from a recent survey.

Genuine Gratitude.

Miss Miller, of Croydon, writes:—"In gratitude, I feel I must write and tell you what wonderful benefit I have derived from taking a bottle of your Carter's Little Liver Pills. Having been troubled with indigestion and sick headache for several months, a friend recommended me to try your famous pills, with the results that after the first dose I found a relief of my very real tonic value, and felt I had at last discovered a remedy which performed what it claimed to do."

Take Carter's Little Liver Pills for the constipation and constipation. 11 druggists 25c and 74c red pills.

Export Of Totem Poles

Investigation Is Ordered In Respect To Carload Shipment

Acting on representations from Premier S. F. Tolmie, of British Columbia, the Dominion Government ordered an investigation into the removal of a carload of totem poles shipped from Prince Rupert for a United States museum.

A car will not be allowed out of Canada pending the enquiry. The premier, on being informed of this shipment, telegraphed immediately to Prime Minister R. B. Bennett, protesting on the ground that the fastidious art of the totem should be preserved as far as possible. Mr. Bennett telegraphed Dr. Tolmie recently assuring him that the whole matter would be the subject of thorough investigation.

Recipes For This Week

(By Betty Barclay)

BRAN GINGER CAKE

- 1/2 cup shortening.
 - 1/2 cup sugar.
 - 1 egg.
 - 1 cup all-bran.
 - 1 1/2 cups flour.
 - 1 teaspoon salt.
 - 1 teaspoon soda.
 - 1 teaspoon ginger.
 - 2 teaspoons cinnamon.
 - 1/2 cup four milk.
 - 1/2 cup molasses.
- Cream shortening and sugar together. Add the egg; beat well. Add the bran. Mix and sift the dry ingredients and add them to the first mixture, alternately with the sour milk and molasses. Pour into greased pans and bake in a moderate oven (375 degrees Fahrenheit) from 30 to 40 minutes. Yield: 10 servings.

FRUITED WHIPPED CREAM

- 3 tablespoons confectioner's sugar.
 - 1 cup cream, whipped.
 - 8 marshmallows, finely cut.
 - 1/2 cup dates, seeded and cut in small pieces.
 - 1/2 cup nut meats, broken.
 - 1/4 cup candied cherries and pineapple, finely cut.
- Add sugar to cream. Fold in remaining ingredients.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

Ceded To China

Area Of 285 Square Miles Handed Back To China After Being 32 Years Under British Rule

The British Empire is 285 square miles smaller than it was several weeks ago.

Wei-hai-wei, which for thirty-two years has been under British rule, has just been handed back to China, and so, as its area was 285 square miles, the British Empire is now that much smaller.

The natives of Wei-hai-wei have so benefited under British rule that they were not at all anxious to be handed over to their native government, and indeed, asked that they might remain British.

Light Fiction

Novel reading can become a habit as harmful as tea-drinking and indulged in with as much mental benefit. It is too easy to be of value. No reading is of any cultural value unless it demands something from us. A book has to be at least a little difficult to be worth reading at all. —Everyman (London), England.

Homestead Regulations

Changes Made On Recommendation Of Minister Of The Interior

Regulations governing the conversion of patented pre-emption or purchased homesteads into soldier grants have been altered in an order-in-council noted in the Canada Gazette. Changes have been made on recommendation of Hon. T. G. Murphy, Minister of Interior, who found that several applicants are debarred from making such conversion on the ground that they had already obtained patent for their pre-emption or purchased homestead.

The new provisions are as follows: "1. Where patent for a pre-emption or purchased homestead has been issued, or where such patent has not yet been issued, if the holder of the pre-emption or purchased homestead is permitted to convert the same into a soldier entry grant, all sums paid on account of principal or interest in connection with the said pre-emption or purchased homestead may, upon application, be refunded to the holder of the land, or to the soldier settlement board in cases where an advance has been made under the provisions of the Soldier Settlement Act."

"2. The foregoing regulation shall be deemed to be retroactive in its application."

Wonderful For Indigestion!

When your stomach feels bad; when Gak, Sourness, Nausea or after-eating pains make you feel miserable—take some of pure, Bismuthated Magnesia will cure almost instantly.

For indigestion, the prompt effectiveness of Bismuthated Magnesia is really wonderful. Even the most obstinate cases quickly respond. Bismuthated Magnesia is quick, pleasant and inexpensive to use. Ask your druggist.

Deaf Children Are Happy

Little Ones At Belleville School Do Not Feel Handicap

"No finer demonstration of the rapid advance which has been made in the care and treatment of deaf children can be found than at the Ontario School for the Deaf at Belleville," says the Ottawa Journal. "No sign of sadness, no sense of handicap or fatality is to be found amongst these children, and despite the fact that 90 per cent. of them cannot hear a single word, they carry on animated conversations, play games, sing and dance, just the same as other little ones who have no such handicap."

"Did you cancel all my engagements as I told you, Smithers?" "Yes, sir, but Lady Millicent didn't take it very well. She said you were to marry her next Monday!"

Felt Tired Out All Day

Could Not Sleep At Night

Mrs. Adamson Lakeland, 2481 St. James St., Montreal, Que., writes:—"After a spell of the gripe I was left very nervous, and felt drowsy and tired out all day, and could not sleep at night. I was also troubled with my heart and did not feel at all like working. I was told about Milburn's Heart and Nerve Pills, and after taking four boxes I was completely relieved of my trouble, and can recommend your Pills to everyone."

COMBINES ACT HELD VALID BY PRIVY COUNCIL

London, England.—The Combines Act of the Dominion of Canada is valid according to the judgment handed down by the judicial committee of the Privy Council, dismissing an appeal from the Proprietary Articles Trade Association of Canada.

Thus the privy council backed the unanimous opinion of the Dominion's Supreme Court, climaxed a four-years' legal battle and opened the way to several investigations of combines.

The case was argued before the privy council last June. The act was passed by the parliament in 1923 to replace the 1919 act, which had been declared invalid by the privy council.

The provincial governments of Quebec and Ontario both supported the contention of the Proprietary Articles Trade Association that the Federal act was invalid.

The P.A.T.A. also contested the validity of the section 498 of the Criminal Code of Canada, and in dismissing the appeal their lordships upheld the validity of this section.

The judgment said that in their lordships' opinion section 498 of the Criminal Code and the greater part of the Combines Investigation Act fall within the power of the Dominion government to legislate as to matters falling within the class of subjects in the criminal law, "including the procedure in criminal matters."

The substance of the act, the judgment continued, is to define and to make criminal, combines which the legislature, in the public interest, intends to prohibit. The definition is wide and may cover activities which have not hitherto been considered criminal.

"But only those combines are affected which have operated or are likely to operate to the detriment or against the interest of the public," and if parliament's genuine purpose determines that commercial activities, which can be so described, are to be suppressed in the public interest, then their lordships see no reason why parliament should not make them crimes.

The criminal law, the judgment went on, is certainly not confined to what was criminal by the law of England or of any province in 1867, when Confederation came about. The power must extend to legislation to make definitions of new crimes.

It is not enough, however, for parliament to rely solely on its powers to legislate as to criminal law, the judgment added. The remedies given under sections 29 and 30, reducing the customs duty and revoking the patents, have no necessary connection with criminal law.

Their lordships have no doubt that they can both be supported as being reasonably ancillary to the powers given respectively under section 91. The judgment declared it is unfortunately beyond dispute that in a country where a general protective tariff exists, persons may be found to take advantage of the protection, and within its walls form combinations that may work to the public disadvantage.

It is an elementary point of self-preservation that a legislature which creates protection should arm the executive with powers for relaxing the protection if it is abused, the judgment declared.

The same reasoning applies to grants of monopolies under any system of patents. The view their lordships have expressed makes it unnecessary to discuss the further ground upon which the legislation has been supported by the reference to the power to legislate under section 91 "for the regulation of trade and commerce," the judgment continued.

Manitoba Seed Fair

Will Be Held in Conjunction With Winter Fair On March 16

Brandon, Man.—Judging by early inquiries, the provincial seed fair to be held in conjunction with the Manitoba Winter Fair, March 16 to 20, will be larger than ever. Now in its seventh year, the seed fair has grown by leaps and bounds and is cramping the generous show space in the Arena building last year. As the fair is an opportunity for growers of surplus grain, grass or clover seeds to get in touch with prospective purchasers, the exhibition is expected to have more than its usual interest in March.

Claim Commander Was Drunk

Crew Of Canadian Vessel Testify Against United States Officer

New York.—Seamen from the Nova Scotia power boat "Josephine K." appeared before the coastguard board of inquiry to testify that Boatswain Karl Schmidt of the "CG-145" was drunk when he boarded the Canadian vessel after its capture near Ambrose Light. Schmidt, who had admitted he fired the shots, one of which fatally injured the boat's master, William Quett, Lunenburg, N.S., was in court and heard witnesses testify that after the capture he continued drinking in the forecastle of the run-runner.

Louis Selig, who described himself as an able seaman from Halifax, N.S., gave the main testimony for members of the crew. Schmidt, he said, seemed "good and drunk" when he saw him shortly after the "Josephine K." was boarded. The boatswain had pointed a gun at Allan Falkenhain, Lunenburg, and maintained he would have to shoot because Falkenhain's name did not appear on the ship's crew list. Schmidt, he said, staggered, his face was red and his eyes "glaring." The commander of the "CG-145" stayed in the forecastle several hours, and while there consumed six bottles of ale and two drinks of rye whiskey, during which time all members of the "Josephine K." crew had an opportunity to witness his condition.

Seaman Allan Falkenhain said he thought Schmidt drunk; that he waved a gun and told him he would shoot him if he didn't belong to the ship. Harry Jewell said: "He was falling all over himself, and rolling around."

Need For Early Session

Rt. Hon. Mackenzie King Issues a Statement

Ottawa, Ont.—With the declaration that in some parts of Canada today the distress is greater than it has ever been, Rt. Hon. Mackenzie King, leader of the Opposition, has issued a statement calling upon the prime minister to shed some light on when parliament will meet. Notwithstanding that the government has had free hand with its policies and expenditures, "conditions in Canada today are much worse than they were at the time of the calling of the special session in September last," asserts Mr. King.

There is, at present, much more need for the regular annual session of parliament to consider the conditions of the country's affairs than there was for any special session in September," added the Opposition leader.

Mr. King remarks that "the pretext that the reassembling of parliament should wait until the arrival in Canada of the new Governor-General cannot be taken seriously." He comments on the fact that Premier R. B. Bennett is going to Washington, and expresses the hope that "before the prime minister embarks upon further missions which take him away from Canada he will at least let the country know when it may expect the reassembling of its parliament."

Asking Lower Freight Rates

B.C. Government Will Back Growers and Cannerymen in Fight

Victoria, B.C.—The government will get behind British Columbia growers and cannerymen in their fight for lower freight rates to the prairies. Premier S. F. Tolmie has instructed Leon J. Lander, K.C., government rate counsel, to co-operate with the growers and cannerymen in commencing proceedings before the railway commission immediately.

Vegetable growers of British Columbia, backed by the cannery industry, appealed to the government in strong terms recently to rescue them from a threatened reduction in growing acreage, by about 50 per cent. this year, by an immediate reduction in freight rates from here to prairie markets.

To this end a large delegation urged the cabinet to appoint counsel, and file an immediate application with the railway commission for a cut in western rates to the level of those prevailing from Ontario to the prairies.

It was expected the government would follow this plan and launch a new rate fight without delay.

Increase in Govt. Employees

Regina, Sask.—An increase of 351 in the number of employees in the various departments of the government over the number employed as at Sept. 9, 1929, is shown in a return to the order of the assembly. This return includes the employees of the liquor board, the federal loans board and the power commission.

MAJORITY FOR LABOR ON TRADES DISPUTES BILL

London, England.—In a packed and excited House of Commons the government got through the second reading of the Trades Disputes Bill by a majority of 77.

The government majority was larger even than had been expected. Only seven other Liberals voted with Sir John Simon in opposition to the bill and with the Conservative opposition. One Liberal supported the bill by his vote; the rest abstained from recording their opinion.

As soon as the result of this vote was announced, Rt. Hon. Stanley Baldwin, Conservative chief, moved that the bill be referred to a committee of the whole House.

Again the House divided. This time, however, the majority of the Liberal vote with the government, and the MacDonald majority rose to 82. The net result is—in the parlance of Westminster—that the bill will go "upstairs" for committee consideration clause by clause. The committee stage will be passed in a standing committee instead of the committee of the whole where the possibility of a government defeat on a matter of detail is always present.

The final day's debate on the bill opened in breezy style with Rt. Hon. Winston Churchill on his feet. It amblined along with the contributions of back-benchers during the dinner period and ended snappily with Rt. Hon. J. H. Thomas, the secretary of state for the Dominions.

Mr. Churchill described the trades unions as pampered pets heaped with privileges under the new bill. The Laborites continually interrupted Mr. Churchill with ironical cheers.

"Why," Mr. Churchill asked, in reference to Leves, "why should a patriotic Conservative trades unionist have to subscribe to the political fund of the cosmopolitan Socialist? Why should a Catholic have to subscribe to a fund, perhaps, of an Agnostic or an Atheist?"

These words brought a Labor storm.

"Filthy argument," one Laborite shouted. Mr. Churchill spoke of the Liberal decision not to vote as an outrage of the first order.

"What," Mr. Churchill asked, "has become of the Liberal traditions?" Here a Laborite interrupted, pointing at Mr. Churchill, said: "He's not a tradition; he's an extradition," and a roar of laughter went up from the House.

The Liberals had compromised on the bill, Mr. Churchill added, they might not dislike it much in the House of Commons, but they were going to hate it like poison "upstairs." Mr. Churchill finished by comparing Prime Minister MacDonald with the "boneless wonder" of a circus.

A new law makes compulsory the establishment of a public library in every municipality of Czechoslovakia.

Winning Alberta Communities in C.N.R. Progress Contests

Announcement of the first year's results in the Canadian National Railway community progress competitions for European settlements in Alberta, showed Norma Ukrainian community near Vegreville to be first, Lloyd-George Scandinavian community near Camrose second, The Pines Ukrainian settlement at Mundare third, Liberty Municipality near Leduc fourth, and Unity Municipality near Radway fifth. Pictures show left to right, farm home of F. Federuk near Vegreville, Brookside school near Vegreville, farm home of Frank Mohler in Lloyd-George district, farm home of S. V. Shenkel in Liberty, the community hall in the Ukrainian settlement at Mundare, and the Clifford school in Unity Municipality.

PROMINENT CANADIAN BANKER

Sir John Aird, president of Canadian Bank of Commerce, which held a general meeting of executives in a magnificent new building at Toronto, the highest in the British Empire, which will now be open to public prior to official opening ceremony.

Precedence Given To High Commissioners

King Gives Order As To Rank On Ceremonial Occasions

London, England.—Office of the secretary of state for the Dominions announces that His Majesty has directed that the high commissioners of the Dominions in London and also the high commissioner for India will rank immediately after the British secretaries of state on all ceremonial occasions other than those when ministers of the crown are present from the Dominions.

This announcement implements the decision reached at the Imperial Conference regarding the precedence to be accorded to the high commissioners.

Position of the Dominion's representative, in relation to a minister of the crown visiting the United Kingdom from the Dominion remain unaltered, the minister being given precedence immediately before the high commissioner concerned.

Heads Canadian Flying Club

Manager Of Royal Bank At Port William Elected President

Montreal, Que.—H. R. Richards, manager of the Royal Bank of Canada in Port William, Ont., was elected president of the Canadian Flying Club Association at the close of the annual convention here. He succeeds J. A. Sully, of Winnipeg. Other officers were elected as follows: Vice-president for the Maritime provinces; R. J. Nelson, manager of the Halifax Shipyards, Halifax, N.S.; vice-president representing Ontario and Quebec, A. Sidney Daves, Montreal; vice-president, representing the western provinces, James A. Bell, president of the Edmonton Flying Club, Edmonton, Alta.; treasurer, H. P. Crabb, Winnipeg, president of the Winnipeg Flying Club.

All meetings of the association were held in camera and no public announcement was made at the close, beyond the list of officers.

Passengers Ordered Deported

Britishers On C.P.R. Ship Barred From Landing In Canada

Vancouver, B.C.—Two passengers of the liner "Empress of Russia," which arrived here from the Orient, Captain W. Little and L. Mercer, have been ordered deported by an immigration board of inquiry. Appeals have been lodged in Ottawa against the rulings.

Captain Little was just discharged from the Indian army and was on his way to join relatives in Toronto. Mercer, from Shanghai, an engineer, the steamer "Hedwig," which was wrecked a few months ago off China, said he intended to settle in Canada. The deportations were ordered under the government regulation which bars all but practical farmers and wives of bona-fide Canadian residents from entering the country.

Mining Men To Meet

Delegates From All Parts Of Canada And U.S. To Attend

Ottawa, Ont.—Delegates from all parts of Canada and some from United States are expected to attend the annual meeting of the Canadian Institute of Mining and Metallurgy from March 4 to 6. Papers on the latest developments in Canadian mining industry will be delivered and many social functions have been arranged.

G. Duncanson will present a paper on exploration work in the north-west territories, particularly around the Copper River; J. P. Nome will relate to developments around Great Bear Lake and John Dryburgh will speak on the nickeliferous ores of the west coast of Hudson Bay.

TEST SHIPMENTS OF GRAIN FROM PORT CHURCHILL

Ottawa, Ont.—Test movement of two or possibly three cargoes of grain, about 75,000 bushels, will be shipped through the port of Churchill, in the middle of next September, according to present plans. A conference held here with representatives of shipping interests indicated that there will be no difficulty getting private steamship companies to undertake the movement. A statement issued on the conference by the Department of Railways and Canals, follows:

"Arrangements for the proposed test movement of grain from the port of Churchill, in Hudson Bay, were under consideration at a conference held in the office of the minister of railways and canals. The meeting was arranged at the instance of the minister, Hon. Dr. R. J. Manion, who is taking a warm personal interest in the whole undertaking, and was attended by the principal officers of his department and by representatives of Canadian Government Merchant Marine, and Canadian National Steamships.

"Dr. Manion was assured by his officers that, from present indications, the port facilities would be sufficiently advanced to admit of the test movement by about the middle of September, the date by which the contractors of the elevators have agreed to have them complete. The movement will disclose to a certain extent the dredging and dock extension program for the present season, and for that reason will probably be restricted to the shipment of two or possibly three cargoes of grain approximating about three-quarters of a million bushels.

"The shipping trade is greatly depressed at present, and from inquiries already received, vessel owners are evincing considerable interest in the possibilities of the Hudson Bay route. No great difficulty, therefore, is anticipated in interesting private vessel owners in the business that the test movement will afford and considerable prestige may be expected to accrue to the steamship company having the honor of handling this first commercial movement of grain out of Western Canada's new port.

"It is too early as yet to speak definitely as to either freight or insurance rates, but arrangements are being made to see that that aspect of the situation is thoroughly canvassed, and at the proper time the minister expects to be in a position to meet any eventually which may develop. Meanwhile, both he and the officials of the department feel that there is no question but that it will be possible to demonstrate, this coming fall, that the facilities of the port will be available and capable of taking care of the business which will be attracted to the port on the inauguration of the route at the opening of the 1932 season of navigation."

SAYS CANADIAN WHEAT IS BEST IN THE WORLD

Toronto, Ont.—"Now is the time for the governments to stock up with better seed wheat for this year's crop, wheat that will fight rust or anything but drought," said Herman Treile, of Peace River, Alberta, world's wheat king, in an interview here. He addressed the Kiwanis Club here on his way to Ottawa to consult with officials of the Department of Agriculture.

Mr. Treile confessed that he is interested in seed wheat, in supplying the Canadian farmer the best possible wheat, and that he is interested in the economics of the agricultural problem. "The trouble with Canadian wheat is there are too many varieties," he remarked. "This country can and does produce the best wheat for milling that the world requires for flour. I'm not interested in bulk wheat—that will come in the Peace River as it has in other parts of the west. My job is to produce better and better seed."

"Canadian wheat is the best in the world," Treile went on. "The world needs the best. Get Canada's quality wheat advertised enough and we don't need to worry about getting rid of our product—without feeding No. 1 Hard to the hogs, which at present relative prices of wheat and pork is a better programme than selling it at less than 80 cents a bushel."

"Russia could not produce as good super-hard wheat as Canada, Treile said, "they have the climate and the soil, but not the organization," he explained. "They are using our brains and our experience."

Ottawa, Ont.—Prestige of Canadian grain on world markets must be regained before the troubles of the western farmer can be cured, said Herman Treile, of Wembley, Alberta, world's wheat king.

Mr. Treile, who with Mrs. Treile is leaving in a few days on a trip overseas, called on Dr. J. H. Griadle, deputy minister of agriculture, and emphasized the necessity of concentrating on Marquis and earlier types of wheat.

"The difficulty of the west," Mr. Treile said in an interview, "is that the farmer has been trying to accommodate the combine harvester to the wheat instead of growing a type of wheat suited to the combine."

"Farmers have been using the combine to harvest late maturing wheat which is not dry when threshed and the effect has been to destroy the prestige of our grain."

As to this year's crop, Mr. Treile said: "The farmer will take what he can get for it and then start all over again."

Mob Lynchers Slayer

North Dakota Is Scene Of Lawless Tragedy

Schafer, N.D.—Reverting to the days before law and order came to the west, a mob battered its way into the town here and lynched a 22-year-old farmer, who had confessed slaying a family of six.

When the crowd dispersed, as swiftly and as silently as it had formed, the body of Charles Bannon, youthful slayer of the A. E. Haven family, was hanging from a bridge over Cherry Creek about a quarter of a mile from town. His neck was broken.

Apparently the mob came from nearby farms that once were a part of the great cattle country about 60 miles north of Medora. None of the mob was recognized.

It was the 12th lynching in the history of the state, eight white men, three Indians and a negro having fallen victims to mobs previously. The last such affair occurred 17 years ago, when Steve Culbertson, a triple outlaw, was taken from jail at Williston and his body left suspended from a nearby railroad bridge.

Young Bannon died pleading that his father, James F. Bannon, also held for the killings, be not harmed. The youth, in his confession, had declared that he was taking revenge for the Haven family massacre, which, he said, occurred after a quarrel last February.

Russian Trade Delegations

London, England.—Rt. Hon. Arthur Henderson, secretary of foreign affairs, informed the government in House of Commons that he was not aware of any negotiations looking to the establishment of Russian trade delegations in any of the Dominions.

The central highway in Cuba is to be completed in February.

NOTES AND COMMENTS

A scrap between neighbors creates interest. It livens things up, and makes those not immediately concerned in the personal side of the quarrel sit up and take notice.

This may have caused the more than usual attendance at the ratepayers meeting last Friday evening. There was no rift in the harmony of the council. The only weak spot is that tax arrears are mounting to an alarming extent, causing some concern.

But when it came to discussing school affairs, the fireworks commenced. The zeal of the chairman in soliciting insurance and urging young lady teachers to take a thousand or two was disapproved of by the rest of the members. Most people when they pass forty years of age wish some enterprising agent had sold them several thousands when they were twenty years old.

The chairman has another year in office. He has, without question, taken a keen interest in his duties, and as actions speak louder than words, his record as chairman of the board is worthy of commendation.

Put a peg of prosperity into your community by staying in it. Always greet your neighbors with a grasp of confidence. Criticize in the spirit of Godspeed. Say a good word if it hurts. Remember that those who insist on hanging themselves will do it if given enough rope. Give your neighbor a right to an opinion as long as he keeps it to himself. Discuss questions involving your better welfare instead of arguing about them. Apply the Golden Rule regardless of consequences. Back up your church and relative affiliations. You will feel better and will be setting a good example for the young people. Give the young plenty of pleasure and a fair amount of work. Failures reflect on the entire town. See what you can do to keep your neighbor on top of the water. Don't let him drown.—Cranbrook Courier.

Many towns that are not fortunate enough to have the "talkies" in their midst would give a good deal to have this form of entertainment for their citizens and residents of their trade territory. A good "talkie" in a community gives it an atmosphere that makes any place a livelier spot in which to live. However, in order to continue to do its part in a community, such an institution must have the generous support of the community.—Cranbrook Courier.

FIGURES ON COAL MOVEMENTS

Railroaders in Regina, Saskatoon and Moose Jaw have already organized to oppose the importation of natural gas. Figures on coal movement have been tabulated as follows:—

In December, January and February last year there were 64 trains of coal handled into the tri-cities by the C. P.R., while about 70 trains were handled by the Canadian National Railways.

There were approximately 128 coal trains operated by the C.P.R. during the winter and engineers needed for this work on the C.P.R. were 1,280. The C.N.R. required 1,300

to move their trains. In addition to these there were 20 other persons such as telegraphers used in these coal movements. In moving the coal over three sub divisions of approximately 110 miles, 8,840 trainmen and engineers were required on the C.P.R., while 4,000 found employment on the C.N.R. This represented 422,400 train miles paid in wages and the revenue to the railways was about a quarter of a million dollars.

Just a few days ago a recommendation against the installation of natural gas for heating purposes in steam heated schools was made to the Edmonton Public School Board by Engineer George Latham. In a report, he stated that fuel costs in all city schools in 1930 was \$16,996. If gas had been used the bill would have been \$28,377. He based the estimate on the actual cost in heating the Normal School with gas—From Western Canada Coal Review.

Money saved is as good as money earned, especially in the things you buy every day for the home. Look up the grocery specials at Coleman stores in this paper.

500 sheets of bond writing paper letter size may be purchased at The Journal office: price \$1.15, or \$2.15 for 1,000 sheets.

Here and There

(581) Inaugurated in 1926 in answer to the demands of rapidly increasing travel between Montreal and Boston, the "Red Wing" fast running Canadian Pacific night express between the two cities will have forty minutes cut from its schedule on and after January 11, leaving Montreal, forty minutes later than before but arriving at Boston at the same time as on the former schedule. The train will leave the Windsor station, Montreal, at 9:55 instead of 9:15 as heretofore. The "Red Wing" is an all-steel train with all equipment of the latest type.

Appointment of W. R. Patterson to be deputy general auditor, Canadian Pacific Railway, is announced by E. E. Lloyd, Comptroller of the railway. He is succeeded in his late position of auditor of disbursements by Charles B. Gordon. Mr. Patterson is one of the younger men holding important offices in the Canadian Pacific Railway, having been appointed auditor of disbursements four years ago at the age of 36. Mr. Gordon was comptroller of the Kettle Valley Railway in British Columbia, prior to his new appointment.

A motor cycle and side car carrying two men and towing a man on skis, broke the silence of Lake Louise December 28 when at nearly 6,000 feet altitude it roared around an improvised track at a speed above 50 miles an hour. It was the first time in history that a motor cycle has been on Lake Louise; the first motor cycle ski-joring that has taken place there and the first time a motor cycle has travelled under its own power from the Prairies to Lake Louise in the depth of winter.

On the stroke of midnight of December 31, 1930, one of the most remarkable railroad careers in the Maritime Provinces ended with the retirement of Charles H. S. Henderson, dean of Canadian Pacific Railway conductors. Mr. Henderson became a train conductor in 1878, at the age of 17 on the New Brunswick railway between St. Stephen and Edmundston. He completed 54 years of service with this railway and the C. P. R. December 31. He has been conductor on the trains of three successive presidents of the Canadian Pacific.

Scheduled to play at least 25 games in less than three months in practically every capital of Europe, the Manitoba University graduates hockey team sailed from Saint John aboard Canadian Pacific liner Melita for Liverpool, January 2. They will return to Canada from Liverpool at the end of March.

The "Corn Belt" of North America has in the last few years slowly pushed its way north and today many parts of the prairie provinces of Canada are producing corn of different varieties and of high quality. At the fifth corn show under the auspices of the Saskatchewan Corn Growers Association, one of the finest exhibits of corn in the history of western Canada was on display.

A recent official report states that over 55,000 lbs of the eight-armed octopus were caught in 1928 and over 28,000 lbs in 1929. The fish is eaten chiefly by Orientals in British Columbia and brings between five and ten cents a pound on the market. The catch is the incidental product of other fishing operations.

Canada Has Taken Adequate Measures For The Protection And Propagation Of Game

The early history of Canada, its exploration and development, is very closely woven with the story of the wild life of the country. The fur was the lure which led the early traders and adventurers to penetrate the interior of the country while the game provided a means of sustenance, not only to the traders and explorers, but also in a large measure to the early colonists.

In those early days every species of game native to the North American continent, including buffalo, elk, antelope, moose, deer, caribou, muskox, mountain sheep, mountain goat, bears, wolves, cougars and other small game and fur-bearing animals as well as game birds of all varieties, were plentiful everywhere within their native range throughout Canada. Owing, however, to the advance of settlement and other contributing factors of civilization the vast supply of game became greatly depleted. In fact, certain species such as the buffalo, elk, antelope, and muskox were in serious danger of total extermination.

Happily, however, the situation has been met by the Federal and Provincial Governments of Canada and means have been taken to protect and conserve all useful species of wild life. The provincial authorities drafted laws conserving the game and at the same time reserved areas for their complete protection.

The Federal Government's contribution to the cause of game protection includes the establishment of six reserves in the Northwest Territories and the Province of Alberta, with an area of 546,857 square miles; 43 bird sanctuaries with an approximate area of 1,000 square miles in which the birds receive absolute protection throughout the year; 51 public shooting grounds with an area of 709 square miles, where birds receive protection during the nesting and rearing period, and the absolute protection of all game, fur-bearing animals, and birds in the eight great National Parks, having an approximate area of over 32,000 square miles.

As these parks and reserves are located in practically every province in Canada all animals and birds are propagated upon their natural range and every species of Canadian native wild life has been saved to posterity. In fact, certain species which are not native to Canada have been introduced successfully and added materially to the value of the country's wild life.

Canada welcomes sportsmen to share in her plentiful supply of game and so vast are her hunting districts and so diversified are the conditions that the hunter, no matter what his preference, is sure to be satisfied. The entire Dominion is opened up by highways, railways, steamship or air lines so that the sportsman is conveyed in comfort to his "going-in" point. At established points he will find accommodation and also outfitters who are prepared to furnish guides, canoes, camping equipment, pack trains and everything necessary for a trip through the country in which he decides to hunt.

Braille Books Circulated

A sidelight on one of the most interesting activities of the Canadian National Institute for the Blind is given at a recent meeting of the directors. It was stated 2,003 volumes in Braille, or raised type, had been circulated by the Institute's library in October, throughout Canada and in parts of the United States, and even in Mexico. The circulation was 500 volumes greater than in October, 1929.

Natural Gas Consumption

The consumption of natural gas in Canada during 1929 for domestic purposes was calculated to be sufficient to displace 640,000 tons of coal. Natural gas is found in abundance in Alberta and in some parts of Western Ontario.

Hungary is increasing all inland postal rates.

"If you wish to get slim, you must take nothing but a few drops of water a day."
"Before or after meals?"—Eugenia, Barcelona.

The Weak Link

Lowering Production Costs On Farm Is Necessary

"If there is one weak link in the chain of farm operation today it is in the well-considered production of farm foods, home grown, produced at cost," asserts G. B. Rothwell, Dominion Animal Husbandman, Department of Agriculture, Ottawa. In the final analysis the low acre unit production is largely the reason for high cost milk, submitting all the imperfections and low average production of our cows. The farmer's one and only salvation today is in lowering production costs under his control, i.e., on his farm.

Alberta Creameries

Receipts For Eleven Months Reach Total Of 14,432,063 Pounds

Receipts of cream in Alberta creameries were more than 40 per cent. greater during November than during the same month of the previous year, the figures being \$1,480 pounds of butter fat as against 575,195 pounds, according to C. P. Marlier, dairy commissioner. Receipts for the eleven months reached 14,432,063 pounds, an increase of about ten per cent. over the corresponding previous eleven month period.

LOVELY NEW SPORTSWEAR

All Tingey models are created and sketched in Paris and the patterns are made in New York. Pique is such a fresh addition to the tweed frock. It has a way of becoming soiled easily, however—and goodbye chic! The busy woman—and who among us is not busy—can therefore only hope for such touches on her frock to be easily removable for laundering.

Note today's model and how extremely easily the pique bows can be reconditioned. The front, broader one is a straight strip bowed and passed through one slot and the closure as shown. On the sleeves narrower strips are similarly passed through two slots. You will note they decorate the upper arm an area of the newest Paris dresses that has suddenly assumed much importance. Other fairly firm woollens besides tweed can be used for this dress. This pattern may be obtained in sizes 14 to 20 and 34 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Dollar Wheat

Livestock Used As A Medium For Marketing Grain At Fair Prices
Most people today think "Dollar Wheat" a thing of the past. But this is not necessarily the case when livestock is used as a medium for the marketing of this essential grain. Values as high as five dollars per bushel when fed to hogs and sold in the form of eggs on the winter market are claimed by feeding experts. But particularly timely and interesting is the finding of the Dominion Experimental Station at Lacombe, Alta., which places per bushel value of wheat at the following figures:

With Pork Selling at	Wheat fed Pigs at	Barley fed Pigs at
12c. per lb.	\$1.48 per bu.	\$1.09 per bu.
11c. " "	1.25 " "	90 " "
10c. " "	1.22 " "	89 " "
9c. " "	1.09 " "	70 " "
8c. " "	96 " "	70 " "
7c. " "	83 " "	60 " "

Radio On The Farm

More Important On The Farm Than Any Other Place

"Information can be just as pleasant an entertainment" asserted Dr. J. H. Grisdale, Federal Deputy Minister of Agriculture, speaking at Ottawa recently. "The radio is important to agriculture. The young people are becoming daily more important on the farm and they want radio entertainment. Radio provides this. It keeps the farmer in touch with the market situation and weather conditions, and it also keeps him in touch with the news of local and world happenings. I think radio is more important in the farm home than in any other home. It turns the world to the front door."

Back To The Farm

Keen Interest Is Evidenced By Farmers In Broad Sow Policy

A new significance attaches to the old familiar slogan "Back to the Farm" in the way of the Broad Sow Policy enumerated by the Hon. R. Weir, Federal Minister of Agriculture, at the Royal Winter Fair, in speaking of it in the first month in full operation over five hundred sow of the select bacon type have been saved from slaughter, bred, and sent back to farms. Saskatchewan and Alberta lead in the number of orders placed but keen interest is evidenced all over Canada. Sows of suitable type are provided farmers at cost, with a further saving of one-half the cost of freight from the stockyard to the buyer's farm.

Byng Not Resigning

Lord Byng, former governor-general of Canada and present head of Scotland Yard, is understood to have denied that he will resign as chief commissioner of the London Metropolitan Police. Lord Byng has been absent, through illness, from his post for many months.

She: "Now what are you stopping for?"

He (as car comes to halt): "I've lost my bearings."

"Well, at least you are original. Most fellows run out of gas."

KING CAROL AND YOUNG SON

Above is an interesting photograph coming from Sinaia, Roumania, showing King Carol and his young son, Prince Michael, and former boyking, all set for a hike on skills through snow-covered mountains of that district.

HOME UNDER POLICE GUARD

Judge Emerson Coatsworth, senior police magistrate and the acting chairman of the board of police commissioners at Toronto, whose home is under police guard following a mysterious threat over the telephone to burn it down.

Cod Liver Oil For Poultry

Suitable In Crude State and Is Not Expensive

An abundant supply of Vitamine D is required to keep laying hens producing and healthy during the long winter months when they are shut in. It is the presence of this vitamin which assists assimilation of the minerals calcium and phosphorus in the production of eggs and eggshells. As the value of cod liver oil for poultry feeding depends entirely on its vitamin content only reliably tested brands should be used. Crude cod liver oil is suitable for poultry and is not expensive. In the dry mash feed one pint of oil to each one hundred pounds of mash is a good ration, while with a wet mash or other feed one to two teaspoons to each twelve birds has been found adequate.—Dominion Experimental Farm Note.

New Signs Suggested

A Houston (Texas) man declares that danger signs at railroad crossings are based on the wrong psychology. He says, tell a man to "Stop Look and Listen," and he is impelled to do none of the three. He suggests for railroad crossings:

"Come ahead. You're not important."

"Don't stop. Nobody will miss you."

"Take a chance. You can get hit by a train only once."

British Industries For Canada

A Birmingham steel manufacturing firm has decided to open branch works in Canada, probably Quebec. A Leicester textile firm and another Birmingham organization in the engineering field are also seriously considering similar steps, while many other firms have made enquiries.

Miniature gasoline pumps, filled with lead pencils, have appeared as desk decorations in Europe.

The King of Spain will sell his race horses.

Government Radio Stations Broadcast Programs To Inhabitants Of Far North

Information About Eggs

Eggs Are Rich In Proteins, Vitamins and Minerals

Two tons of grain will produce 480 dozen of eggs. Sold as grain at a price of \$1 per egg it would be worth \$480. Sold as eggs at 25 cents per dozen it would be worth \$120.

An egg is 66 per cent. water, 13 per cent. protein, 10 per cent. fat and 11 per cent. lime or ash.

In an egg 60 per cent. is white, 30 per cent. yolk, and 10 per cent. shell.

The best eggs of the year are those laid in the months of April, May and June.

An egg eaten between September and March is worth more to the average person in a northern climate than one eaten between April and August.

Eggs and milk together are liquid meat in the most digestive and assimilable form.

An egg weighing two ounces holds approximately 70 calories in fuel value.

The egg is aptly termed "bottled sunshine." It is rich in proteins, vitamins and minerals.

Of the five vitamins the egg supplies Vitamine A, B, D and E. It is particularly rich in "D" the sunshine vitamin.—Department of Agriculture, Ottawa.

Douglas Fir Stands Test

Great Britain Pronounces Railway Ties From B.C. Satisfactory

Last summer a consignment of Douglas fir railway ties was forwarded to Great Britain for experimental purposes and subjected to exacting tests by the Forest Products Laboratory in London, England. These were of a thoroughly practical character and resulted in their being declared highly satisfactory. As one of the first consequences the representative of the British Columbia Government in London, England, has been approached concerning another shipment of about 300,000 of these ties.

Railway managements of the consolidated systems into which the British roads are now divided are said to have been keenly interested in the tests and if prices are satisfactory more large orders may follow. The total requirements are immense but the Pacific coast has equally vast resources of Douglas fir from which they can be filled without difficulty. Millions of feet can be supplied, whenever needed, to the advantage of both parties.

Don't Overfeed

Bacon Type Of Hog Which Brings Money To The Producer

With an abundance of low priced coarse grains and wheat available there is an apparent tendency on the part of farmers to overfeed their market hogs. This is shown by the increase in the average weight of hogs now coming out to the market. The two hundred pound hog is the ideal market weight. A. A. MacMillan, Chief of the Sheep and Swine Division of the Federal Department of Agriculture, points out. With the price of land what it is today, relatively lower than the price of bacon, it is the bacon type which means money to the producer. Farmers should watch hog feeding closely to guard against both light weight and excess fat—he must keep away from the out-weight grades if he is going to get the top of the market for his hogs.

Seed Production

Thousands Of Bushels Of Registered Seed Produced In The Maritime Provinces

The objective of the seed production policy of the Federal Department of Agriculture is a suitable and plentiful supply for Canadian farmers through conveniently localized production. Digby and Yarmouth counties in Nova Scotia have produced 1,700 pounds of registered and 2,500 pounds of commercial turnip seed for 1930; many thousands of bushels of registered seed oats have been produced in the Maritime provinces, together with considerable quantities of registered seed wheat and barley; while Prince Edward Island and New Brunswick have districts in which seed of a particularly high quality is available for Maritime supply during the 1931 crop year.

Mechanical Egg Sorter

Five persons can sort and candle 60,000 eggs a day with the aid of an improved machine introduced in Germany. It automatically tests the eggs, weighs them and distributes them into five different grades for sale.

The traditional silence of the Arctic has been broken by government radio stations broadcasting news and special programs to the ice-bound inhabitants of Canada's far north. It was announced by Hon. Alfred Durnaleau, minister of marine. No longer will it be necessary for Hudson Bay factors, miners, trappers and prospectors to wait months, and sometimes years, to learn who won the world series, the results of Canadian or United States elections, how their favorite hockey team is progressing or the same and accomplishments of the latest world celebrity.

Through the government chain of radio stations in the north all such news now is relayed to them a few hours or days after it has taken place. The inauguration of the system was accomplished a few days ago and already the results have justified the effort. Mr. Durnaleau said. Three of the government stations, those at Churchill on Hudson's Bay, Chesterfield Inlet on the eastern side of the bay and Copper Mine River on the Arctic Ocean, have been equipped with broadcasting apparatus. Each station goes on the air at stipulated times after it has picked up news synopsis, personal announcements and general information from Canadian, British or United States radio stations. This is consolidated and edited before being relayed to the isolated inhabitants of the north.

One of the chief duties of the stations is to broadcast the latest "Scotti News" or "United States News" to the north. When a trader or trapper leaves a post for another settlement, this is sent over the air and if he does not arrive at his destination on time, immediate efforts are made to locate him. Personal messages from "down south" are sent out to missionaries and traders which might take months to reach them if sent by mail.

Receiving sets are becoming standard equipment with the men of the north. They are looked upon as being almost as necessary as dogs, guns or heavy clothing.

Canada's Blueberry Industry

Figures As To Exact Volume Of Production Not Obtainable

Blueberries represent probably Canada's greatest unorganized industry. No modern methods for cultivating or harvesting have as yet made their appearance in the Dominion, and only a superficial idea of the volume of production is obtainable. They represent both a fresh and frozen fruit trade and at the present time there are some 600,000 lbs. held in storage for the baking trade. Only about one-tenth of this quantity will be used in Canada.—Department of Agriculture Ottawa.

Frog Farming

Manitoba Farmers Have Put Frog Raising On A Commercial Basis

Farmers living at Vita, Man., have discovered a new "mortgage lifter," easily the equal of the homely pig, in frogs. What was formerly a local pest has been turned into a valuable commercial asset. Frog production has been placed on a purely commercial basis by this group of enterprising farmers, whose output is now rated in tons and finds a market at good prices in the hotel and restaurant trade in Eastern Canada and the United States, where frogs' legs are esteemed a table delicacy.

Spain produced more than 7,000,000 tons of coal in the last 12 months.

Tests indicate that oxygen is deadly to mosquitoes in the larval stage.

Old Lady: "Nothing in this town is the same price as in Madrid."
Shopkeeper: "Pardon, madam—postage stamps!"—Buen Humor Madrid

Make Some Hot Biscuits Today!

Make a dozen delicious biscuits this way. Sift together twice, 2 cups Purify Flour, 2 cups baking powder, 1 tsp. salt. Cream 1/2 cup each of butter and milk with the dry ingredients, using the tips of your fingers. Add 1/2 cup each of milk and water, mixing with knife until you have a very soft dough. Pat out lightly on mixing board until 1/2-inch thick. Cut out and bake in hot oven for 15 minutes.

These biscuits—made with Purify Flour—will keep moist for several days and may be re-heated without getting dry.

DELICIOUS SAUSAGE ROLLS—can be made from the above dough, but use half the shortening. Roll to about 1/4-in. thick, cover sausage and bake 25 minutes, or until brown, in hot oven (450°).

MEAT PIE COVERINGS using same dough are extra tasty.

Western Canada Flour Mills Co. Limited
Toronto, Winnipeg, Calgary

Look for our Company's name on the Purify Flour sack. It is your guarantee of quality from a responsible milling concern.

WORLD HAPPENINGS BRIEFLY TOLD

A general world disarmament conference will be called in the latter part of January, 1932, the League of Nations Council has decided.

Marshal Henri Philippe Petain, defender of Verdun, became one of the French Immortals by election to the French academy, succeeding Marshal Foch.

His once Imperial Majesty, William Hohenzollern, on January 27, celebrated his 72nd birthday quietly at Dorn House in the Dutch village of his exile.

Maintenance of the present wage scale throughout industry is vital to the return of prosperity, is the belief of John L. Lewis, president of the United Mine Workers of America.

Captain Einar-Paul Lundborg, Swedish aviator who rescued Captain Nobile in the disastrous Italian flight, is dead of injuries received in an aeroplane crash.

The Salvation Army receives approximately 200,000 pounds (about \$1,000,000) for "social and emigration work," under the terms of the will of the late John Brownell Holt, Lancashire aluminum and brass magnate.

The municipality of Ahmedabad, India, has decided not to observe His Majesty's birthday, June 3, in protest against the "repressive policy of His Majesty's representatives." It is explained that the King personally was held in high regard.

The British Government has made formal representations to the U.S. State Department regarding "unsatisfactory conditions" under which British subjects are being held at some centres and particularly at Seattle, Washington, for deportation.

Preparations are being made for the taking of the 1931 census of Canada, where an army of government workers will visit every Canadian home and take note of the number, sex, religion, nationality and other details of the occupants.

Still Giving Out Decorations

Berlin Lawyer Proud Of Recognition From Ex-Kaiser

The former Kaiser is still dishing out decorations although in exile. "As a sign of my thankful recognition of your successful legal work and your proved true conviction in your right against me and spite, I bestow upon you the cross of Knight of my Royal House Order of Hohenzollern (signed) Wilhelm Emperor Rex."

This is the text of the imperial certificate which a Berlin lawyer, P. Bloch, is proudly showing his friends.

How To Lose Fat and Get That Youthful Feeling

Over in Great Britain when a man is feeling "as fit as a fiddle" and looking the "picture of health" they say:

"HE'S GOT THAT KRUSCHEN'S SALTS."

That means he takes his little dose of Kruschen Salts every morning.

It's the same in the U.S.A., in Germany—in Holland—in Australia—in South Africa, for Kruschen Salts are now sold the world over.

Kruschen Salts is not one salt only—it is the combination of six salts necessary to healthy living.

Take half a teaspoon in a glass of hot water before breakfast every morning, modify your diet and exercise regularly. But don't miss a morning dose of Kruschen not only purifies and keeps the stomach, liver, kidneys and bowels in a splendid healthy condition, but purifies your blood-stream, and sends new life and activity to every part of your body.

W. N. U. 1875

MacMillan Planning Northern Expedition

Has Ordered Airplane For Use In Mapping Unexplored Area. Commander Donald B. MacMillan, Arctic explorer, has revealed plans for an expedition this summer to explore ice-bound territory north of Labrador.

The commander has placed an order at Los Angeles, Cal., for an aeroplane to be used for mapping the unexplored area, north of Nain, Labrador, and in winter, he said, he hoped to reach the great ice cap of Eatin Land.

Charles Rocheville, Los Angeles plane designer, who went with MacMillan into the Arctic in 1926, will go along again as chief pilot.

MacMillan said three ships would carry a party of 50 men to Nain, the base of the expedition. They are his own auxiliary schooner, a similar ship carrying Dr. Alexander Forbes of Boston, and a third vessel under the direction of Sir Wilfrid Grenfell of St. Anthony, Newfoundland. The first objective is a territory to the west of the coast line 250 miles north of Nain.

"With an aerial camera we can place this district accurately on the world map," MacMillan said. MacMillan said he would sail on June 20.

Valuable Relic For National Museum

Old Indian Tomb Elaborately Carved Found In B.C.

An Indian tomb, probably the last of its kind, has been received at Ottawa from British Columbia and will be added to the collection of almost priceless Indian relics in the National Museum. The tomb is the work of some member of the Musqueam, a tribe of which only some 50 remain.

The discovery was made on the north shore of the Fraser River near Vancouver by Harlan I. Smith, Dominion anthropologist.

Elaborately carved, the relic takes the form of a wooden sepulchre mounted on a boat-like platform about eight feet in length. When found the upper part of the tomb, which is shaped like a large box, contained bones which were interred before bringing the relic to Ottawa. Mr. Smith believes the sepulchre contained two bodies, probably those of a chief of high rank and his wife.

The state of preservation indicates the tomb is about 75 years old. Only one other example of this type is known.

British Empire Fair

Forty-Eight Canadian Firms and Institutions Will Have Exhibits At Buenos Aires

Forty-eight Canadian firms and institutions have advised the Department of Trade and Commerce of their intention of exhibiting at the British Empire Fair to be held in Buenos Aires from March 14th to April 27th, which will be opened by H. R. H. the Prince of Wales. Every province is contributing displays. There are nine exhibitors from Montreal; three from the two transcontinental railways, the Royal Bank of Canada and the Sun Life Assurance Company, which are national in character. Seven firms have their headquarters in Toronto, seven in Bradford, three in Hamilton, two in Weston and three in Ottawa, though the latter include the Department of Agriculture and the National Art Gallery.

Flow Long Distance

Royal Air Force Covered Many Miles In Exercises

In the two days and three nights occupied by the Air Exercises of the Royal Air Force last year, British service aircraft flew a distance equivalent to more than 12 times round the world at the equator. Two hundred and fifty aeroplanes took part in 63½ hours of ceaseless air "war" between mythical lands dubbed "Red Colony" and "Blue Colony." They flew by night and day and frequently in bad weather. Men and machines were employed intensively, as in actual warfare.

Makes Fitting Easy

Special shoes partly made of a transparent material have been introduced by a Paris shoe store to aid men and children in trying on foot-wear. These transparent shoes are carried for each model in the store, and they are said to aid appreciably in determining where the foot is pinched, and consequently in choosing a perfect shoe.

Small Child: "We want to buy a ticket."

Box-Office Clerk: "But there are two of you."

"Well, aren't we half-sisters? Add that up."

IMPLEC
Go Amazing Quick Way
Pimples ended so quickly by "Implec." See the effect in 10 minutes. A doctor's amazing discovery. Get "Implec" from drugist today.

British Machine Wins

Belgian Government Places Order For Fighting Airplanes

In a competition held in Belgium to select fighting aeroplanes for the Belgian Air Force the winning machine was the British "Puffin II," designed and built by the Fairey Aviation Company, of Hayes, Middlesex, England, and driven by a Rolls-Royce engine of 550-h.p. It is claimed that this machine is the fastest aircraft of its type in the world, with a speed of more than 200 miles an hour, even when carrying full military load.

The Belgian government has ordered 45 of these machines.

Bird Banding

Obtaining Information Regarding Life History and Migration Habits Of Native Birds

Through the voluntary efforts of persons throughout Canada and the United States, aluminum bands or rings are being placed on the legs of wild birds in an endeavor to obtain information concerning the migration and life histories of our native birds. Bird banding is a co-operative effort in which the National Parks of Canada Branch, Department of the Interior, Ottawa, and the Biological Survey, United States Department of Agriculture, Washington, D.C., take joint action.

Moose Jaw Board Of Trade

Instructive Film Is Shown At Annual Meeting Held Recently

At the annual meeting of the Moose Jaw Board of Trade on January 15th, a novel and instructive feature was the showing of a film made by the Provincial Government dealing with the natural resources of the province. This film, it is said, proved a revelation to many of the members who were not fully aware of the extent and variety of the resources of the province.

Octopus Caught Off B.C. Coast

An official report states that over 55,000 pounds of octopus were caught in 1928, and over 28,000 pounds in 1929, off British Columbia. They are the incidental product of other fishing operations, taken, for the most part, in the nets of small druggers.

Feeling Was Mutual

"Daughter," said the father sternly, "I don't like that young man you go out with."

"Yeah!" retorted daughter. "Well, don't worry, you're simply poison to him, too."

Tourist (in mining town)—Is this a healthy place to settle in?

Hotel Proprietor.—It is that, sir; but it's a most unhealthy place if you don't settle.

SUNDAY SCHOOL LESSON

FEBRUARY 8

JESUS THE WORLD'S TEACHER

Golden Text: "As ye would that men should do to you, do ye also to them likewise."—Luke 6:31.
Lesson: Luke 10:1-16.
Devotional Reading: Proverbs 3:13-18.

Explanations and Comments

The Law Of Love, verses 27-31.—But I say unto you that hear: here Jesus turns from the worldings upon whom He has been pronouncing His woes. To His followers, and counsels them to be ruled by love in their treatment of their enemies. The Greek word for "love" in our text is carefully chosen. It is not demanded that we should love our enemies with a natural and spontaneous affection ("phileo"), but with a supernatural ("agape"). At the time when Jesus uttered these words, revenged wreaked upon an enemy was considered noble. How cleverly gloated over the misfortune of an enemy; he thought himself fortunate on his death bed that he could say that no one had done more good to his friends nor more mischief to his enemies!

The Goodness Expected Of Christ's Followers, verses 31-35a. If you love them that love you, if you do good to them that do good to you, what kind of thanks have you, what kind of reward do you deserve? For even sinners love those who love them. Love given for love is only glorified selfishness. Show your love by unselfishness, by loving your enemies as well as your friends; by doing good to those who do evil to you as well as to those who treat you well; by lending to those from whom nothing will be received as well as to those who will return the favor. And the great argument is that even sinners do good to those that do good to them. How cleverly gloated over the misfortune of an enemy; he thought himself fortunate on his death bed that he could say that no one had done more good to his friends nor more mischief to his enemies!

Kindness and Mercifulness, 35b, 36.—Do all things—love your enemies, do them good, and lend, never despairing—and your reward shall be great—ye shall be sons of God. He is kind toward the unthankful and evil. Be merciful even as your Father is merciful.

"It is an attribute of God Himself, And earthly power doth then show itself God's when mercy seasons justice."—Shakespeare.

Be Charitable In Judgment and Generous In Giving, verses 37, 38.—Judge not, and ye shall not be judged; and condemn not, and ye shall not be condemned; release, and ye shall be released. These are general statements which are not to be taken without qualification. The example of Jesus Himself shows when judging and condemning is a duty. Read Matthew 18:15; 2 Tim. 4:2. Apply the Golden Rule, and judge others as you would that others should judge you.

"An otherwise beautiful character is often almost repulsive by the single bad habit of censoriousness. It is one of the temptations of the mind to indulge in harsh judgment of the faults of others. Cultivating a stern conscience merely for the sake of flaunting goodness is no more a sake of flaming goodness than a Christlike, and no more heart-enriching and satisfying, than giving to make a display with money."

The Loudest Noise

A Montreal scientist says there is too much noise in the world, but fails to point out that the loudest sound of all is that made by the ticking of the clock in a store that does not advertise.

COUGHS-COLDS
Dangerous complications can quickly develop if coughs and colds are neglected. At the first sign of trouble treat your throat with **SPOHN'S COMPOUND**. Prepared by famous expert chemists. Cures by thousands for over 25 years. On sale everywhere. Write for full particulars or sample bottle, postage prepaid. **SPOHN MEDICAL CO., Dept. 332, Graham, Ind.**

Airplane That Floats

Successful Test Is Made Off the Coast Of England

A British Royal Air Force officer successfully landed a specially equipped airplane on the sea off Felixstowe, and the plane remained afloat long after the pilot, uninjured but drenched to the skin, was taken off by a rescue boat.

The plane used in the experiment was an ordinary "service machine" with certain modifications intended to keep it afloat for at least four hours after alighting on the sea. For this purpose the sides of the fuselage had been made to open outwards by operation of a lever in the cockpit. This was for the purpose of releasing air filled bags designed to keep the machine afloat.

When Squadron Leader Goodwin landed the plane on the water he switched off the engine, emptied the gasoline tank and released flotation bags. He was free from the usual safety belt in case things went wrong and he had to swim from the plane. In addition, he had padded the lower side of the top plane with spongelike rubber to soften the blow in case it struck his head when the plane hit the water.

Inside the fuselage were bottles of compressed air communicating with the rubber and canvas flotation bags, which, when the sides of the fuselage dropped outward, were free to float beneath the top wing of the airplane, thus keeping the machine afloat.

The test worked well. Though the airplane, when it landed on the water sank for a few seconds until only a small part of the upper structure was visible. The flotation bags brought it to the surface again and rescue boats took the pilot from the cockpit while the machine was left to complete a four-hour floating test.

Accidents in British factories in the last year numbered nearly 150,000.

Acts like a Flash
on Coughs & Colds
A speedy, safe, proven remedy for children and adults.
BUCKLEY'S MISTURE
Acts Like a Flash—A Sweet Sip Powder!

Make Your Windows Pay
Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE
THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, adding the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

SOUR STOMACH

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard anti-acid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes. Don't depend on crude methods.

Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Remember—the genuine is always a liquid. It cannot be made in tablet form. Look for the name Phillips. It is always on the wrapper for your protection. Drugstores everywhere have the 50c bottles.

THE DUSTY HIGHWAY

BY CHRISTINE WHITTING PARMENTER

Copyright 1929

CHAPTER X.—Continued.

"Close the door, Julie. There's a draught through here and it's going to rain. What time do you expect Mrs. Halliday? I suppose she wanted you tonight because of her company. Will they be here to supper?"

"Who? Mrs. Halliday ain't got no company. She ain't Nick" (Julie, who had cleaned house for everyone in Bakerville since Nick was a little boy, hadn't been designated to say "Mr. Hastings"), "started soon as they eat breakfast. Mr. Halliday's away. Not comin' back till tomorrow. He's buryin' his ma."

Gay sat down rather weakly on the stairs.

"I know, but—but I thought she had company. I supposed that was why she didn't go to the funeral."

"You supposed wrong then. I heard her tell Mr. Halliday that seen' his ma had never liked her, she didn't see no reason why she should go. I felt kind o' sorry for him, because 'twas plain he was feelin' bad. He said: 'Angela, I'd like you to go with me. What will Mary think?' Mary's his sister—an invalid. She can't walk, but just then they see me in the next room and stopped talkin'."

Gay sat very still on the stairs. Her knees felt as though they wouldn't hold her up.

"Perhaps," she suggested, "perhaps they were to pick up her friends at the station."

But Julie's answer dashed this hope.

"No, they went in the small car, not the new one. Besides, Mrs. Halliday put up the lunch, and she only put up enough for two; stuffed eggs, cold chicken, salad sandwiches (every one in a separate piece o' paper and the crusts sliced off), spice cake, and—"

A flash of lightning and terrific crash of thunder interrupted. Little Nick, always nervous at any sudden noise, cried out, and even Sony, who had been taught not to mind the storms, scuttled close to his mother's skirts like a frightened chick.

"Gee!" said Julie. "Glad I come over when I did. Say, let's get out of this dark hall. I'll turn on a light in the attic' room."

Gay arose, her knees still strangely weak, and lifted her baby.

"Sonny, dear little boy, you go to Julie. There's nothing to be afraid of. Don't you remember what Daddy told you about Rip Van Winkle and the nine-pins? They must be having a splendid game today—Rip and the little brown men."

"I wish Daddy'd tum," said the boy wistfully. "I wish he'd tum."

Tears sprang to Gay's eyes.

"Maybe he'll come soon, darling," she comforted; but Julie, with characteristic tactlessness observed:

"And most likely he won't. They was goin' clear to Mason's Falls. Then him's awful. That's why she wanted Nick to go. I guess, though, I should think she'd stay at home, seen' that she wouldn't go."

"Now look here," said Julie sensibly, facing Gay with a hand on either hip. "A fair exchange ain't no robbery. If Nick was home he'd be helpin' you clean up and unpack, or he'd changed some from the boy his Aunt Nettie trained up. And if he's drivin' Mr. Halliday's car for her, it won't hurt nobody for me to sweep the dust out o' your kitchen. Men folks is terrible careless housekeepers—the best o' 'em. Now you run along and make the beds, and Sunday or no Sunday, I'll stick up down here. Mr. Halliday won't ever know a thing about it—not from me anyway."

The lightning had almost ceased, but it still rained drearily, and the house was dark. Gay glanced at the clock. It was nearly six, and her baby nodded.

"I'll give him some milk and put him to bed now, Julie," she said, "and by the time he's off Sonny'll be ready for the night. You're good to help me, but—but I'd have to have Mrs. Halliday find you here."

"She won't find me," Julie was removing her cuffs and turning back her skirt. "I declare, this ain't no costume for cleanin', but it's sort o' nifty, or at you think, Gay? I—"

"Man tum!" called Sonny from his watch tower.

Julie and Gay both turned to the window to see a taxi stopping before the house next door.

"Glory!" came breathlessly from Julie. "It's him! She didn't expect him till tomorrow. I got to run. What'll he think when I tell him she's been off all day with another feller? Sorry I can't stay, Gay; but likely he'll want some supper. If the storm gets worse again I'll run over, I—"

Julie was still talking as she ran out the door and through the gap in the hedge. Gay, watching in a petrified silence, saw James Halliday take out a latch key and open his front door. Suddenly she visioned the lonely home-coming after his sad errand—she remembered Julie's disclosure of those sounds in the night that "might have been a cat," and now, to come home to find his wife gone—a pleasuring-gone "with another feller," as Julie put it—gone with Nick—

(To Be Continued.)

Persian Balm—alluring, provocative and charming. Fragrant and refreshing as a cool breeze in summer. Delightful use. Creams complexions of surpassing loveliness. Makes the skin velvety soft in texture. Soothes and dispels all irritations caused by weather conditions. Softens and whitens the hands. Persian Balm is a peerless toilet requisite for women who care for charm and distinction. Use for hands and face.

War-Time Parcel Delivered

Posted Fifteen Years Ago Was Returned To Sender

To receive a parcel posted to him 15 years ago was the novel experience at Winnipeg, recently, of Pipe-Major Alex. Cameron, of Transcona. Fifteen years ago a small tin box of cigarettes was mailed to Mr. Cameron, then serving in Flanders with the famous Black Watch Regiment. After many months of travel through the numerous base post offices in war-torn France and Flanders, the parcel eventually was returned to W. Connor, the original sender.

Italy's aluminum industry is expanding.

Stillness is called sentiment by those who are in love.

"There! I do believe the worst of it's over. I've got' out and cleaned your kitchen. Miss Halliday's payin' for my time so might as well use it. She don't want me for anything but an ornament to her back porch to-day. How do you like my hair this way, Gay? It's the latest style."

"I don't think I've got used to it yet," Gay answered, feeling, in spite of her foreboding thoughts, an hysterical desire to laugh.

"I'm avin' up for a permanent wave," said Julie. "Then it won't look so straggly. That's what Miss Halliday does to hers. Say! you'd ought to see the truck on her bureau! spends enough time an' money fussin' with it! It takes her more'n an hour alone to fix her hair."

"I shouldn't think they'd ever need fixin'," said Gay discouragingly, as she looked down at her own brown bands. Even the month at Uncle Sim's had not entirely obliterated the scars of toil. Nick had once said that her hands were beautiful. They were beautiful no longer—and Mrs. Halliday's were soft and white. Was Nick, perhaps, looking at them now, clasped lightly in her lap, and thinking—

"Now, Sonny," Julie was saying briskly as she looked from the window, "that storm's most over. I'm goin' to help your ma, and if you stand here by the window, and if you see your pa and Mrs. Halliday ride up, you run an' tell 'em an' I'll scoot home and let 'em in the front door."

"Oh, Julie," said Gay uneasily, "I mustn't let you use Mrs. Halliday's time to do my work."

Keep Free From Fat—Feel Younger

Unlike most salts, Kruschen isn't simply a laxative—if that's all you want any kind of salts with any kind of a label will do—but it is that all you want.

When you take Kruschen Salts you don't stimulate your bowels, liver and kidneys to function naturally and perfectly, but you supply every internal gland, nerve and fibre in the body with nature's own revitalizing and rejuvenating minerals.

Get a bottle of Kruschen Salts at any drug store—take one-half teaspoon in a glass of hot water every morning before breakfast—cut down on sweets and fat forming foods and get some moderate regular exercise—in just a few days indolence changes to activity and life grows brighter.

A Virginia woman writes: "I just started on my second bottle of Kruschen Salts and have been losing flesh right along—you have fathomed the secret of flesh reduction."

Silk Trains Listed

As "Passenger Extra"

Given Right-Of-Way On Every Road On This Continent

In railroad slang, "in the hole" means putting a train on a switch or siding in order to let a faster or more important train pass it on an unobstructed track. Everything and everybody is "put in the hole" for the silk train on its flight across the continent from the Pacific port of Vancouver, Seattle or San Francisco. It has the right-of-way on every road, and where railway systems, from vice-president to brakemen, are keyed up and co-ordinated for its prompt schedule and its safety. On one particular occasion, writes George Marvin in the Baltimore Sun, during the transit of a cargo of silk through one stage of its flight from Japan to the Atlantic seaboard, Prince George of England was hustled "into the hole" somewhere between Kamloops and Field, British Columbia, to let the train pass.

Well, what's the hurry. Why should such a common commodity as silk hog the road over freight and express. tourisms, regular passengers and even princes? The answer is money—no mere casual money, but an awful lot of money—put in seven figures! When the "Empress of Russia" docked at Vancouver a year ago it carried \$44 million dollars' worth of raw silk in its hold. The week before the "President Madison" had steamed into Puget Sound to discharge a 6-million-dollar cargo on the docks of Seattle.

At 11 o'clock Prince George was on his way across Canada on a train so charged to make up lost time that you would think it impossible to overtake it. It was after midnight when the silk train pulled out of the dock siding and started east, but before dawn revealed the majesty of the Canadian Rockies it had overhauled and passed a mere human train which had been unceremoniously "put in the hole."

Why was this train—why is any train—of fifteen cars, running as a "passenger extra," shot from Vancouver to Fort William, 1896 miles, in fifteen hours—less time than the fastest long distance passenger express that traverses the same distance? The answer is that enough raw silk to fill fifteen cars has value running into millions of dollars; it deteriorates rapidly in transit; it is extremely very high and the market fluctuates from day to day with the available supply, so that one day may make a difference of as much as 50 cents a bale.

Value, then, makes the speed and "holes" the Prince. But we are still left a little in amazement that silk should attain such value. As gold has become a necessity in international barter as a standard medium of exchange, so has silk become a near necessity as a universal medium of feminine self-expression. If the colonel's lady and Judy O'Grady are sisters under their skins, almost as certainly are their kindred next to their skins. In their millions the world over they have got to have silk.

Recognized as a leading specific for the destruction of worms, Moth of Graves' Worm Extirpator has proved a boon to exterminating children everywhere. It seldom fails.

India Will Enter Exhibit

India will exhibit at the World's Grain Exhibition and Conference in Regina in 1932, according to word received from Mr. E. A. Hyatt, I.S.C., secretary of the Imperial Council of Agricultural Research, New Delhi, conveyed through the office of His Excellency the Viceroy. Grain and fodder crops will constitute the display.

Take away the garage, the car opener, the bridge table and the radio set and what have you left of the modern home.

Was In Bed All Summer

"I have to work in the store and do my own housework, too, and I got nervous and run-down and wasn't bed nearly all summer. The least noise would make me nervous. I was told to take Lydia E. Pinkham's Vegetable Compound and I have taken seven bottles. It has made me stronger and put more color into my face. I am looking after my store and housework and my four children and I am getting along nicely now."

—Mrs. J. Main, R. R. No. 5, Barton St. East, Hamilton, Ontario, Canada.

Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham Med. Co., 254 West 12th St., St. Paul, Minn., U.S.A.

New Development in Shipbuilding

Launched With Steam Up and Ready To Go To Sea

For the first time in history a ship has been launched with the steam up and smoke issuing from the funnel and ready to go to sea.

It is a matter of satisfaction that for this new development in shipbuilding England is responsible.

The vessel in question was H.M.S. Brilliant, a new destroyer built at Wallsend. The vessel is 323 feet long, has a displacement of 1,350 tons, guns, engines, masts were all in position. The usual method is to launch the ship as soon as the hull is complete, and then fit it up while it is afloat.

There are spacious and comfortable quarters, including bathrooms, for the crew of the "Brilliant."

Waste Gas May Be Used

Experiments Being Made In Turner Valley Oil Fields

It is believed that Turner Valley gas, which at present is going to waste at the estimated rate of about 10,000 tons a day, can be converted into benzene in sufficient quantities to be commercially profitable, also into alcohol in paying quantities, and the scientific experiments being made along these lines in the oil fields of Turner Valley, Alberta, will be continued on an increased scale. Encouraging reports thereon were made recently at a meeting of the associate committee on gas research of the National Research Council.

Constipated Children

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the stomach must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take and can be given to the new-born babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Montreal Fur Auction

The recent fur auction of the Canadian Fur Auction Sales Company in Montreal, was pronounced satisfactory as to demand and values. A total of 9,447 fox skins were sold at an average price of \$53.07.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain, will cool the inflamed skin and draw the pus. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

Covering fruit with a thin film of viscose is a new idea in fruit preservation.

Business men of Belgium are optimistic over 1931 prospects.

Winnipeg Building Permits

The total of Greater Winnipeg building permits for the year 1930, amounted to \$9,254,371, which includes the cities of Winnipeg and St. Boniface, and seven municipalities.

The pulp and paper industry is Canada's most important manufacturing industry.

for ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, let Castoria soothe and quiet him. Sometimes constipation, or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

Fletcher's CASTORIA

Little Helps For This Week

"In Thy light shall we see light"—Psalm xxxvi. 9.

We older children grope our way from dark behind dark before; And only when our hands we lay, Dear Lord, in Thine, the night is day, And there is darkness nevermore.

Reach downward to the sunless days, Wherein our guides are blind as we, And faith is small and hope delays; Take Thou the hands of prayer we raise.

And let us feel the light of Thee. —John Greenleaf Whittier.

A man who looks toward the light sees no shadow; a man who walks toward the light leaves darkness behind him. People get in darkness by turning away from the light. They hide in obscure corners; they bury themselves in nooks, where the Sun of Righteousness cannot reach them; and faith is small and hope delays; Take Thou the hands of prayer we raise.

Personal and Local

Mrs. L. G. Tallman of Taber is visiting with the Rev and Mrs. A. S. Partington for a few days

Mr J. C. Cox and Mr. Arthur Reynolds left on Wednesday morning by automobile for Calgary and Edmonton.

A meeting will be held in the K. P. hall on Fri., Feb. 6, at 8 p. m., to organize a Caledonian Society. All interested are invited—Rev. A. E. Larke.

A lovely bouquet of flowers was received by Mrs. J. Scott last Sunday in honor of her birthday. On Monday a surprise birthday party was held at her home. A very enjoyable evening was spent playing cards, the prizes being won by Mrs. Price and Mrs. Beck.

Bill Lewis desires to express his appreciation for the kindness of Mr. C. W. MacKinnon in securing treatment for his daughter at the Shriners hospital in Winnipeg, and he is pleased to state that she has shown a marked improvement.

The Ladies Aid of the Holy Ghost church will hold a Whist Drive on Thursday, Feb. 12th in the Parish hall. Ladies and girls 1st and 2nd prizes and a door prize will be awarded. Refreshments. Tickets 35c. Everybody welcome

United Church Services

Services at 11 a. m. and 7 p. m. The subject in the evening: "In what way are we to forgive those who sin against us?"

On Monday, Feb. 9, the Young People's League will hold a Valentine Social at the home of Mr. and Mrs. Edgar Reid, Carbondale. All games, contests, and stunts will be in keeping with the occasion. Admission 25c. Proceeds to be donated to missions.

On Sunday, Feb. 15, at 7 p. m., the Young People will take entire charge of the service. The message will be brought to the congregation by Wilmer Cox. The senior and junior C. G. I. T. groups will be the choir for this service.

In the near future we shall have a Baptismal service and a reception of new members into the fellowship of the church. If any of the children of members or friends of the church are to be baptized, or if any adults desire to join the church by letter or on profession of faith, the minister would appreciate your notifying him of your desire.

The Journal office will print 100 good quality envelopes for \$1.00, or 100 letter size paper for \$1.00, print-

Employment in Coal Mining

As in 1929, there were losses of employment in mining during the first part of 1930, followed by a series of advances lasting almost without interruption until the beginning of November, when declines were indicated; the gains during this period of expansion, however, did not result in so high a level of employment as in 1929, but this level was higher than in 1928 and earlier years on record. The index averaged 117.8, compared with 120.1 in 1929 and 114.4 in 1928. In coal mining, conditions were not quite so good as in 1929, employment being generally less active. The mean index was 104.1 as compared with 107.4 in 1929, and 106.4 in 1928, while the labor force of the co-operating operators averaged 27,548 workers in 1930—Western Canada Coal Review.

Extra Special

Aylmer Orange Marmalade, 40 oz. glass jar .40

Mrs. H. A. Cooke of Taber, who is an old Ontario friend of Mr. and Mrs. G. R. Powell, is visiting with them this week. Mrs. Cooke came with her son in law Mr. W. Douglas, who went on to Cranbrook to visit his parents and who is expected to return to Coleman on Thursday.

Five cars of visitors from Pincher attended the Orange Lodge meeting here last Thursday, when an address was given by Rev. A. E. Whitmore, of that town, and a very enjoyable meeting was held. Adam Wilson is worshipful master of the local lodge, which has nearly 60 members.
